FEATURED PROJECTS

[Adopt and Chill](#) | <https://adopt-and-chill.surge.sh/>
[GitHub Repo](#) | [Video Walkthrough](#)

Description:

- Adopt and Chill solves the serious problem of overcrowded animal shelters in a silly way but also using a currently discussed topic. The user enters a zip code, clicks on an image representing their preferred marijuana species (Indica, Sativa, or Hybrid), and receives two recommendations - a marijuana strain and an available shelter dog from PetFinder.com with similar characteristics.

Technologies used:

- HTML, CSS, JavaScript

[FurEver 🐾💖 It's a pawesome match!](#) | <https://furever.evamontgomery.net/>
[GitHub Repo](#) | [Video Walkthrough](#)

Description:

- FurEver is a pet adoption website. The initial idea was, to create a website similar to a "matchmaking" page like Tinder or match.com. The current version lets a user browse through "adoptable" dogs and gives them also the option to list or edit a dog. The pets listed are only for demo purposes and are not actually adoptable.

Technologies used:

- HTML, CSS, Express.js, PostgreSQL, Node.js, Express.js, AWS

PROFESSIONAL HISTORY

blacQube

Atlanta, GA

Digital Community & Content Manager

July 2015 – July 2019
